

2026 CORE Grants Program Frequently Asked Questions

Letters of Intent (LOIs) are due December 15, 2025 at 11:59pm ET
Full applications (approved LOIs only) are due January 15, 2026, at 11:59pm ET

All documents are submitted through [ProposalCentral](#)

SUMMARY OF SUBMISSION INFORMATION

The application process is paperless. Applications are reviewed electronically and only documents submitted online will be reviewed.

Submit an LOI online on [ProposalCentral](#)

Deadline: December 15, 2025 at 11:59pm ET

You are required to submit an LOI for your project. The LOI requires your name, institution, the title of your project, a brief abstract (<2,000 words) and asks you to categorize the topic by specialty. The LOI is a non-binding agreement and assists administrators in gauging how many reviewers may be needed for each subcommittee to review the expected volume of applications.

Submit the full application on [ProposalCentral](#)

Deadline for full applications: January 15, 2026, at 11:59pm ET

Please read all instructions below. Applicants who are not eligible for an award and/or do not follow the instructions for preparing an application may be administratively withdrawn from consideration.

Late submissions will not be accepted, and deadlines will be enforced. Please allow enough time to submit in case of website malfunction, internet outage, or other issues. If you experience technical problems accessing the ProposalCentral site or uploading your submission, please email COREGrants@entnet.org and pcsupport@altum.com immediately.

CREATING/UPDATING AN ACCOUNT IN ProposalCentral

If you are a new user of ProposalCentral:

- Under "APPLICANT OR AWARDEE" LOGIN, click "Need an account?"
- Complete the basic registration and agree to the Terms of Service and Acceptable Use Policy.
- You'll receive an email with a confirmation number.
- Login as an Applicant and enter the confirmation number from your email.
- Update your Professional Profile and link your ORCID account if you have one.

More information on registering and completing your profile can be found [here](#). **If you are already registered with ProposalCentral**, access your account with your Username and password. If you have forgotten your password, click on "Forgot your password?" link.

For assistance, contact

- COREGrants@entnet.org
- pcsupport@altum.com, or call 1-800-875-2562

GENERAL PROGRAM INFORMATION

The Centralized Otolaryngology Research Efforts (CORE) program is collaboration of the American Academy of Otolaryngology—Head and Neck Surgery Foundation (AAO-HNSF) and:

- American Head and Neck Society (AHNS)
- American Rhinologic Society (ARS)
- American Society of Pediatric Otolaryngology (ASPO)
- Association of Migraine Disorder (AMD)
- American Neurotology Society (ANS)
- Akouos/Eli Lilly
- International Surgical Sleep Society (ISSS)

CORE members agree to a uniform, centralized research grant application, review, and administration process. This process was designed to achieve three objectives:

- Provide support for the most meritorious research in otolaryngology-head and neck surgery
- Educate young investigators to prepare competitive grant applications
- Prepare more surgeon-scientists to serve as peer reviewers for NIH and other research agencies

The CORE review includes three subcommittees: Otolaryngology, Head and Neck Surgery, and General Otolaryngology. The reviewers are made up of experienced investigators and representative physicians from all collaborating societies.

The CORE review follows a similar process utilized by the NIH. Each application is assigned 2 - 3 independent expert reviewers who submit a written report that addresses predetermined review criteria. In March, all reviewers meet in-person to discuss the applications and assign a priority score to each based on significance, approach, and feasibility of the research strategy. Each application receives a detailed Summary Statement of the review (aka "pink sheet" or critique) with the application strengths and weaknesses to assist applicants with future grant-writing efforts. Applications, critiques, and funding recommendations are provided to the societies who determine the final award.

CORE Grant Cycle Timeline

Funding Opportunity Announcements Released.....	October 2025
LOI Deadline.....	December 15, 2025
Application Deadline.....	January 15, 2026
Initial Review by CORE Study Section.....	Mid-January – Early March 2026
CORE Study Section In-Person Meeting.....	March 14, 2026
Review by Governing Bodies.....	April – May 2026
Granting Societies Make Funding Decisions.....	June 2026

2026 CORE Grants Program FAQs

LETTERS OF INTENT(LOI)

What are the awards for the 2026 CORE Cycle?

For information regarding awards offered during the 2026 CORE Cycle, the [CORE website](#) will have the latest details available starting Fall 2025.

When do LOIs open?

CORE Grants program will start accepting LOIs for the 2026 Cycle beginning October 15, 2025.

What is the deadline for submitting LOIs?

The deadline for submitting LOIs is December 15, 2025, at 11:59pm ET. LOIs are reviewed on a continuous basis as they are submitted.

When can I start working on my full application?

You can begin work on your full application once your LOI has been submitted and approved by the CORE team. **Once your LOI is approved by the CORE team, you can start your full application immediately. You do not need to wait until after December 15 to begin your full application.**

Is an LOI required to submit an application?

Yes. An LOI must first be submitted and approved before you can submit a full application. The LOI is a non-binding agreement, meaning that approval of the LOI does not obligate you to submit a full application.

An LOI must be submitted electronically using [ProposalCentral](#), by December 15, 2025. The LOI requires your name, institution, the title of your project, a brief abstract, and the project's focus area, discipline, and topic area.

The LOI includes:

- a) Name of Principal Investigator (PI)
- b) Project Title
- c) PI contact information and education
- d) Institution
- e) Whether the project is a resubmission (if yes, note previous submission date)
- f) Other sources of funding (if applicable, sources should be listed)
- g) Total award amount requested
- h) Start date and end date
- i) Project Summary/Abstract (2,000 characters max, including spaces. Text only. No special characters or formatting)
- j) Selected 'Focus Area' from key words provided (can select multiple key words)
- k) Selected 'Discipline' from key words provided (can select multiple key words)
- l) Selected 'Topic Area' from key words provided (can select multiple key words)

After submitting, the PI will receive an approval or rejection notification via email. If you receive an approval email, you will have access to begin on your application.

Is an applicant required to submit an application if an LOI has been submitted?

No. Submitting an LOI does not commit you to submitting a full grant application.

What is the purpose of an LOI?

The purpose of the letter of intent is:

- 1) To ensure that individuals are not applying to multiple mechanisms with the same project
- 2) To allow administrators planning time to contact expert reviewers
- 3) To ensure applicants are applying to the correct mechanism for their project(s), academic level, and experience

Can I submit an LOI and application for more than one grant?

You are not allowed to submit the same LOI for more than one grant mechanism. If the same LOI is submitted to more than one grant mechanism, they will be rejected. Applications will be reviewed only once.

You may apply to more than one mechanism if you have unique projects. We ask that the PI submit a letter with each application to verify resources to work on all projects concurrently.

If an LOI or application was submitted to the incorrect grant mechanism, how do I change it?

Please contact the CORE Grants team (COREGrants@entnet.org) to request a change to the grant mechanism. In your message, include the PI's name, proposal ID number, project title, the original grant mechanism, and the mechanism to which the project should be moved. Please do this as soon as possible.

Can I modify my proposal after submitting my LOI?

Yes, you can make changes between your LOI submission and your full application submission.

GRANT APPLICATION

Which grant should I apply to?

Review the 2026 CORE Grants At-A-Glance table (Appendix B) to determine the grant(s) appropriate for you. Often, the selection is influenced by:

- Your subspecialty or research area of interest
- Your career stage
- Type of grant mechanism you are seeking (research project or career development)

Who is eligible to apply?

Eligibility varies by grant mechanism. Please review the individual Funding Opportunity Announcement (FOA) for the grant or the 2026 CORE Grants At-A-Glance Table (Appendix B).

What is the deadline for submitting full applications?

The deadline for full applications is January 15, 2026, at 11:59 pm ET. **You must have an approved LOI to be eligible to submit a full application.**

Where do I apply?

You can submit your application through ProposalCentral. Once you have made your account and log in as "Applicant or Awardee," you will click on the "grant opportunities" tab and search "CORE" to access 2026 CORE grants.

- For basic instructions on submitting applications through ProposalCentral, please use this [guide](#).
- For inquiries about the listed awards, please contact the CORE team at COREGrants@entnet.org
- If you encounter any issues with your ProposalCentral account, reach out to pcsupport@altum.com or call 1-800-875-2562.

Which partner societies, organizations and sponsors are currently collaborating with CORE?

CORE is a collaboration with AAO-HNSF, AHNS, AMD, ANS, ARS, ASPO, and Eli Lilly.

Can I change the title of my grant application?

The title may be changed before the application is submitted. Titles can be changed in the "Title" section of ProposalCentral. Remember to click 'Save' once you've made the change.

Can the PI be changed on an application if we've already submitted an LOI?

The new PI will need to create an account in ProposalCentral, and the CORE Grants team will need to update the record. The applicant should notify COREGrants@entnet.org with the new PI information as soon as they become aware of the change.

Can I apply for a CORE grant if my project already has funding?

This depends on the specific grant mechanism. Please review the Funding Opportunity Announcement (FOA) of the grant mechanism to confirm your eligibility. Any additional funding should be disclosed in the "Other Support" section of your application.

Can I apply for a CORE grant if I have been awarded a CORE grant in the past?

Yes. Applications are reviewed independently. Concurrent projects must be disclosed in a letter or other supporting documentation. Applicants must not have any delinquent deliverables on their current project. If deliverables are delinquent, they must be uploaded to the applicant's ProposalCentral account prior to the January 15, 2026 deadline. Any outstanding deliverables at the time of review will be noted in the review package for the new application.

What are the page limits for the research strategy?

Page limits for the Research Strategy are noted as follows:

- a. Career Development Grants: **12-page limit for Research Strategy**
 - AHNS/AAO-HNSF Young Investigators Combined Grant
 - AHNS/AAO-HNSF Translational Innovator Award
 - ASPO Research Career Development Award
 - ARS New Investigator Award
 - ARS Friends in Research Award
- b. All other Research Grants: **6-page limit for Research Strategy**

Please note: page limits are strictly enforced. Applications that do not follow the page limits will not be reviewed.

Can medical students apply for a CORE grant?

It depends on the grant mechanism. Please refer to the 2026 CORE Grants At-A-Glance table (Appendix B) and the [FOAs](#) for each grant mechanism for specific eligibility information.

If I am not from the US, can I apply for these awards?

Some grant mechanisms offer awards to individuals outside the US, like the AMD Resident Research Grant or the ISSS Research Grant. We recommend reviewing the Funding Opportunity Announcement (FOA) and Eligibility checklist for specific details regarding eligibility for non-US or non-Canada applicants.

If I have applied to be a CORE reviewer or am currently a reviewer, can I also submit an application?

Yes, CORE reviewers may apply for a CORE grant in the same cycle. However, any individual with a conflict of interest will be required to recuse themselves and will not participate in the review process for that grant mechanism.

Can an organization apply for a CORE grant?

No, CORE grants are specifically awarded to individuals. However, a member of the organization may apply for the grant as the Principal Investigator (PI), depending on the eligibility criteria of the specific grant mechanism.

What is the process for resubmitting an application?

When resubmitting an LOI, select 'Yes' on the drop-down box marked 'Resubmission?' on the Title Page section. When completing your full application:

- Refer to the "Resubmission Instructions" in ProposalCentral for more details. **NOTE: If you are submitting a project previously submitted by another individual, please include such information in your cover letter.**
- In the Title Page section, DO NOT enter resubmission information in the text box. The text is not extracted when reviewers download the application!
- Your resubmission should include the following in a single PDF file: your cover letter to the CORE Study Section, the previous critique with your responses, and if applicable, a brief letter of permission from the previous PI. Upload this PDF under "Summary Statement (Resubmissions Only)."

What is a preceptor, and which programs require a preceptor?

A preceptor is a designated faculty member at the institution who will directly supervise the research and evaluate the progress. If research intersects multiple areas of expertise, multiple preceptors may be necessary. The selection of a preceptor is considered in the grant review process.

A preceptor is required for the following grants:

- AAO-HNSF Resident Research Award
- AMD Resident Research Grant
- ARS New Investigator Award
- ARS Resident Research Grant
- AHNS/ AAO-HNSF Young Investigators Combined Grant

What letters of support should I include with my application?

If an individual will play a key role in the project, it is recommended to have them write a letter of support to confirm their role in the project. You should also include their biosketch pages. Letters should be obtained from the following:

- Co-Investigator,
- Preceptor, (if applicable)
- Mentor, (if applicable)
- Consultant, (if applicable)
- Collaborator, (if applicable)
- Department/Chair Head

A letter from the Department/Chair Head must be included with all applications. It should be a reference for the applicant and confirm the applicant's availability for the required period of time. The letter should also address the support of the Department/Division for the project, availability of resources for the project, and verification that any resident applicants will be permitted to spend the specified time on the project. For applicants in private

practice who do not have a Department Chair, letters from collaborators should instead confirm the applicant's availability and the resources that will be made available for the project.

If applying for an ASPO grant, a letter of support must accompany the application from an ASPO member.

Scan or convert your letters to .pdf format so that they may be uploaded to the application site.

Whose signatures should I obtain on the cover sheet?

At a minimum:

- Applicant
- Sponsor or department head
- An authorized official of the institution

After the application is submitted, print the provided cover page for the signatures required for that grant mechanism. Signatures must be original or electronic. Signatures indicate the application has been reviewed. Scan and upload signed documents to complete the application.

Do I need a biosketch for everyone involved with the project?

Yes. A biosketch must be included for all key personnel named in the application. Be sure to list any collaborating investigators who contribute to the scientific development or execution of the project and include all degrees for everyone. A sample biosketch is provided in the "Instructions, Templates & Samples" section of the application in ProposalCentral.

I would like to include additional information outside of the Research Strategy section. Where should I add this information?

You may submit additional information in the optional Appendix. **Do not use the optional Appendix to circumvent page limitations.** Tables, charts or graphs essential to the application should be included in the Research Strategy and will count toward the page limit. The Research Strategy must be able to stand on its own as a complete document. The optional Appendix should be reserved only for supplementary material and kept to a minimum. Bibliography and references may be added in the optional Appendix.

Do I need to submit the "Other Support" section?

Yes. Other Support includes all financial resources, active and pending, for all individuals listed in the application. Include a section for each of the key personnel you have listed, even if they have no current active support. Indicate whether support for the submitted project is being sought after from other funding agencies or organizations. See the provided "Other Support" sample in the "Instructions, Templates & Samples" section of the application in ProposalCentral.

Where do I upload the bibliography/references? Does it count as part of the page limit for the research strategy?

The bibliography and references can be uploaded in the optional Appendix. If the bibliography or reference list is included in the Research Strategy, it will not count against your page limit.

What if I don't have my final signature page complete by January 15, 2026?

We understand that getting the final signature page signed by all of the necessary staff may take some time. If you do not have all of the signatures by the January 15 deadline, please upload what you do have to ProposalCentral. **Once you have the fully signed signature page, please scan the document (pdf) and email the CORE Grants Team at COREGrants@entnet.org.** Emailed copies must be received within the first 14 days after the application deadline. Please be advised that no grants will be awarded without a fully signed signature page.

My IRB/IACUC approval is taking longer than expected. Can I still submit an application?

Yes, you can still submit an application. However, it is essential to include the finalized IRB (Institutional Review Board) or IACUC (Institutional Animal Care and Use Committee) approval by the time you commence the project as an awardee.

Can the technical personnel supported by the award be listed as key personnel?

Yes, technical personnel can be listed as key personnel. Key personnel are those individuals who participate in the scientific development/execution of the project. This will generally include individuals with professional degrees but may also include individuals with other degrees at the master's and baccalaureate levels. Support personnel are those individuals who provide administrative or technical assistance to the project, e.g., dishwashers, animal caretakers, histopathology technicians, electron microscopy technicians, and in some instances research technicians or associates. Refer to Appendix A for detailed allowable expenses information. You may also refer to the "Terms" section of the specific mechanism for which you are applying.

What are indirect costs?

The [NIH defines](#) these costs as "necessary costs incurred by a recipient for a common or joint purpose benefitting more than one cost objective, and not readily assignable to the cost objectives specifically benefitted, without effort disproportionate to the results achieved." These include costs such as fringe benefits, overhead, general and administrative expenses, etc. In many cases, university or institutional policy stipulates that a portion of grant funds be allocated toward institutional indirect costs. If this is the case, no more than 10% of the grant funds can be utilized for indirect costs.

Review considerations

When does the CORE Study Section take place?

The CORE Study Section is consistently scheduled for the third weekend in March. This year, it falls on March 14, 2026.

I am interested in becoming a reviewer, where do I sign up?

We will be releasing reviewer applications after the LOI submission opens. If you provide us with your name and email, we will ensure that you receive a notification when these applications become available.

What are the review considerations for a project?

Applications will be evaluated for scientific and technical merit by experts in the subject matter of the application. Priority scores will be assigned to applications based on their scientific merit, feasibility, innovation, and approach. Additional evaluation criteria include:

1. *Significance*: The extent to which the project will make an original and important contribution to biomedical and/or behavioral science.

2. *Approach*: The extent to which the conceptual framework, design (including, as applicable, the selection of appropriate subject populations or animal models), methods, and analyses are properly developed, well-integrated, and appropriate to the aims of the project, including the following:

- a. Plan for use of controls
- b. Sample size justification
- c. Power functions where appropriate
- d. Analysis techniques

3. *Feasibility*: The likelihood that the proposed work can be accomplished in the project period by the investigators, including the adequacy of plans for the recruitment and retention of human subjects.

4. *Subjects*: The appropriate, safe, and humane use of subjects, both human and animal, if applicable. The project must be approved by the appropriate intramural institutional committees. Institutional approval is not a priori evidence of a procedure's acceptability.

5. *Personnel*: The following will be used to evaluate personnel:

- a. Do the personnel have the appropriate background and skills?
- b. For training grants, are the personnel appropriate to the objectives of the grant?
- c. Does the PI have an active role in the project beyond supervision of technical personnel?

6. *Budget*: The following will be considered in evaluating the fiscal plan:

- a. Are the funds requested appropriate to the design, the facility, and to the personnel?
- b. Are the proposed expenditures adequately justified?

How are funding decisions made?

The CORE reviewer recommendations, scores, critiques are shared with each sub-specialty society along with the grant applications. The final decision is made by an advisory panel, council, or board of the funding society.

What are some of the main reasons that projects are assigned a low priority score during the review?

- Insufficient information or documentation.

- Inadequate statement of hypothesis, experimental design, or methods.
- Failure to demonstrate awareness of and plans for coping with key problems and pitfalls associated with the proposed research.
- Insufficient or improper controls.
- Failure to describe potential relevance of the proposed study to the funding opportunity announcement.
- Failure to document the necessary skills or training to accomplish the goals of the proposal.
- Failure to meet all criteria described in the funding opportunity announcement.
